- **General notes:**  
Water hazard class 1 (German Regulation) (Self-assessment): slightly hazardous to water  
According to appendix 4 of VwVwS dated 27.7.2005 (German regulation)  
Do not allow undiluted product or large quantities of it to reach ground water, water course or sewage system.  
Discharging bigger amounts into drains or the aquatic environment may lead to decreased pH-values. A low pH-value harms aquatic organisms. In the dilution of the use-level the pH-value is considerably increased, so that after the use of the product the aqueous waste, emptied into drains, is only low water-dangerous.  
The surfactant(s) contained in this preparation complies(comply) with the biodegradability criteria as laid down in Regulation (EC) No.648/2004 on detergents. Data to support this assertion are held at the disposal of the competent authorities of the Member States and will be made available to them, at their direct request or at the request of a detergent manufacturer.
- **12.5 Results of PBT and vPvB assessment**
- **PBT:** Not applicable
- **vPvB:** Not applicable
- **12.6 Other adverse effects** No further relevant information available

## \* SECTION 13: Disposal considerations

- **13.1 Waste treatment methods**
- **Recommendation:**  
Must not be disposed of together with household garbage. Do not allow product to reach sewage system.  
Disposal according to instructions of local authorities
- **European waste catalogue:**  
07 06 01\* aqueous washing liquids and mother liquors  
20 01 29\* detergents containing dangerous substances  
15 01 10\* packaging containing residues of or contaminated by dangerous substances
- **Uncleaned packagings:**
- **Recommendation:**  
Packagings that cannot be cleaned are to be disposed of in the same manner as the product.  
Disposal must be made according to official regulations.
